Metsurintie 4N 100, Kuopio,
70150, Finland

Profile

I have expertise in Robotics and Automation, 3D Design, Python, C#, C, JavaScript, AWS, and full-stack development including front-end (React-JS) and back-end technologies. Additionally, I specialize in mobile development using React Native for both Android and iOS platforms, with extensive knowledge of relational databases like MySQL and No-SQL databases such as Firebase and MongoDB. I am proficient in version control and can effectively work both independently and as part of a team.
